

A middle-aged man with short, graying hair and a serious expression stands in front of a white Scania truck. He is wearing a dark blue and white jacket with white stripes on the sleeve and blue jeans. His hands are in his pockets. The truck's grille and logo are visible on the left side of the frame. The background is a blurred outdoor setting.

Scania Tachograph Services
– the right tool for the job

Scania Tachograph Services

*Manages downloads, storage and activity reports
remotely and automatically.*

MANAGES DOWNLOADS, STORAGE AND
ACTIVITY REPORTS REMOTELY AND
AUTOMATICALLY. We know that you
and your drivers already have too much
on your hands to get slowed down with
tachograph data. Why not let us help you?

Scania Tachograph Services can make
life easier for you and your drivers by
downloading the data automatically and
making it readily accessible. You'll have
access to activity reports for both driver and
vehicle data. No matter where in Europe
your fleet is – and no matter where you are.

We offer this service for your Scania
vehicles and other makes in your fleet.

Save money and make life easier – *immediately*

- No extra downtime – download tachograph and driver card data automatically, while the vehicle is in motion.
- No missed downloads – you can even get reminders sent via email or to your phone.
- Reliable and secure.
- Legal compliance without hassles.
- Reports on drivers and vehicles easily accessible online.
- Easy to use for operational analysis and business improvement.
- One set monthly charge per vehicle – including downloading, storage and access to reports and analysis.

Remote downloading – *easy access*

Use Scania Tachograph Services for remote downloads and to store both vehicle and driver data on our secure servers. The vehicle data is downloaded automatically once a month – so you don't even have to think about it. The driver card is downloaded automatically or by pressing a button in the vehicle, whenever it's convenient for the driver.

Trust us to take care of your data

Your data is safely stored on a secure server, accessible through the Scania Tachograph Portal – any time, no matter where you are. You'll have access to driver reports that show when and for how long drivers have been driving, resting or carrying out other activities. Similar reports for the vehicle allow you to see who has been driving, how far and for how long. You can easily make use of these reports in your business planning.

The principles of Scania Tachograph Services downloading

Use Scania Tachograph Services for remote downloads and to store both vehicle and driver data on our secure servers.

SECURE SERVER

SCANIA TACHOGRAPH PORTAL

You can easily access a calendar that shows you when downloads are overdue, planned or already performed. You can also see if driver or company cards are about to expire, so that

you can order new ones. If for some reason a download is not performed as planned, the system can send a text message to the mobile phone as a reminder.

Your tool – *the* Scania Tachograph Portal

The screenshot shows the Scania Tachograph Services web interface. At the top, there are navigation tabs for Home, Operations, Analysis, Upload, and Settings. Below the navigation, there are sections for 'Registered cards', 'Expiring cards', and 'Infringement statistics'. The 'Infringement statistics' section contains a table with columns for Driver, Time period, Infringements, and Report. To the right, there are sections for 'Delayed downloads' and 'Latest transferred files', each with a table listing download details. On the far right, there are icons for 'Send SMS', 'FAQ', and 'Download'.

You can see which downloads are overdue.

You can see when downloads have been performed.

In this side you have an overview of the infringements per driver for a selected time period. It's also possible to create reports from this table.

Facts

Tachograph

Stores 365 days of vehicle driving data. Legislation varies from country to country; as a general rule, data should be downloaded at least every three months.

Driver card

Driver card data should be downloaded every three weeks or so, since the card may fill up after 28 working days. After that, old data will be overwritten without warning.

Downloading

Download remotely from the vehicle using Scania Tachograph Services – handling tachograph data automatically and driver data can be downloaded automatically or by simply pushing a button.

Compliance

Meets EU standards for secure downloading, storage, access and activity reports. Access your data online on a secure server through the Scania Tachograph portal online – anytime you need it. For remote downloads, the data will download automatically wherever the truck is located in Europe.

Company Card

Links the data from your digital tachograph to your company. You can either insert it into the tachograph, or, if using remote download, connect it to your office PC.

System requirements in the vehicle

- Digital tachograph – both Stoneridge 7.1 or later and VDO 1.3 or later.
- Scania Communicator for wireless data transfer.
- Scania Communicator 2.1 for automatic driver card downloads.

System requirements in your office

- Personal Computer (PC) with Windows XP or Vista, or Windows 7, Windows 8 and Internet Explorer 7 or higher, or other common browser.
- Smart card reader.
- Tachograph company card.
- Internet connection 1 Mb/s or higher.
- Screen resolution: 1024 x 768 or better.

Other tachograph services

You can still stop at a Scania workshop for a physical download. And if you invest in the necessary equipment you can download the data yourself, just log on to the Scania Tachograph portal and transfer the data to our secure servers.

For driver cards, you can purchase a card reader and PC software from Scania.

- Digital tachograph data from vehicles shall be downloaded at least every 90 days.
- Driver card data should be downloaded at least every 28 days.
- Data must be downloaded regularly in order to prevent data loss from overwriting.
- Tachograph data must be downloaded securely, stored securely for at least one year, and provide the basis for accurate activity reports.

Scania Tachograph Services help fulfill all these requirements and make compliance easy and cost-effective.

Scania Services Dedicated all the way

Scania pursues an active policy of product development and improvement. For this reason, Scania reserves the right to make changes relating to design and specification, its products and services and any information without prior notice. Furthermore, due to national or EU legal requirements, some products and services may not be available in all markets.

For further information in these respects, please contact your local dealer or www.scania.com
