

CPC Driver training Course

Environmental & Vehicle Technology (H1)

Duration:	3.5 hours (excludes breaks) We provide lunch and refreshments.
Objectives:	To make drivers aware of the environmental impact of transport and the technology used to minimise it. Develop understanding of a driving style which allows the technology to work to greatest effect. Finally, a look at the latest technical innovations from the driver's point of view.
Aimed at:	Professional drivers looking to improve and modernise their driving technique and increase their understanding of the environment and how their actions affect it.
Delivery:	The course is classroom based and will be delivered by a Scania trainer at Keltruck Head Office at West Bromwich. Understanding will be assessed throughout the course using interactive delegate response technology.
What you will gain:	<ul style="list-style-type: none">▪ A better understanding of environmental issues▪ Understanding of vehicle emission regs: Euro 5 and 6▪ Knowledge of how new vehicle technology affects the driver▪ How driving style allows modern vehicles to work at their most efficient▪ 3.5 hours DCPC credit
